Subject: RE: County Wide- posting of documents

Chris et al –

Attached are the relevant documents having to do with the OM&M plan we requested for the isolation break and engineering controls once the work was completed at Countywide. The state took oversight from there and just incorporated the 'U.S. EPA approved OM&M plan into a set of Director's Final Findings and Orders issued to Republic. The actual plan is too big to attach but all three volumes along with a lot of other relevant documents, work plans and approvals can be downloaded from www.epaossc.org/countywide in the 'documents' section, or http://www.epaossc.org/site/doc_list.aspx?site_id=3944

I am also attaching the letter we used to approve final implementation of the AOC along with our expectation that the OM&M plan would be implemented.

I hope this information is helpful and please do not hesitate to contact me with any questions, clarifications or requests for additional information.

Subject: County Wide- posting of documents

Hi Paul,

Thank you again for your presentation this morning on your experiences at County Wide SLF in Sparta, Ohio. Please feel free to pass on my contact information as needed to enable the sharing of information between EPA and MDNR staff. As I mentioned this morning, I am very interested in any conditions you required in your letter to the facility, especially in regards to the barrier construction.

I am copying Aaron and DHSS staff as they are also interested in any documentation you can share.

Thank you.

Chris Nagel
